

**WPC decking ( wood-plastic composite)** is the commonly used resin adhesive with polyethylene, polypropylene, PVC, mixed with more than 50% of the materials such as wood powder, rice shell, straw and other waste plant fibers to form new wood materials, and then plates or profiles are produced through plastic processing processes such as extrusion, molding and injection molding. WPC composite decking is an ideal alternative to traditional hardwood board. It is both ideal for commercial and residential, home and garden, swimming pool. There is **three catagories** for WPC composite decking: Classic Composite Decking, Embossing/Online embossing composite decking and Co-extrusion composite decking.

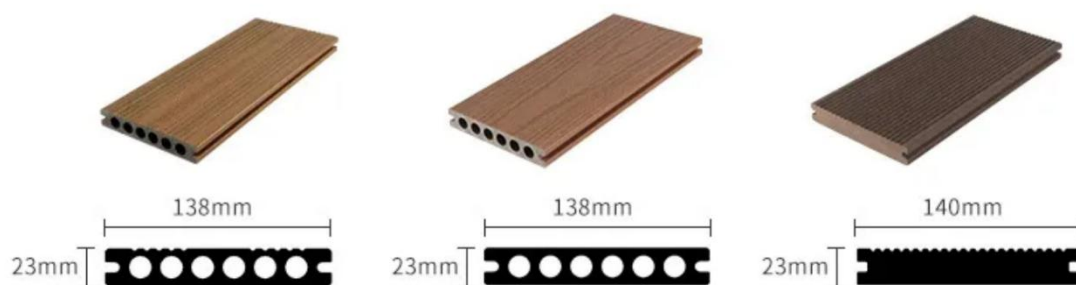

**▲ CLASSIC WPC DECKING** PLEASE CONTACT US FOR MORE SPECIFICATIONS AND STYLES.

**▲ 3D EMBOSSED DECKING** PLEASE CONTACT US FOR MORE SPECIFICATIONS AND STYLES.

Warranty	More than 5 years
Technics	Co-extrusion
Surface Treatment	Wood Grain
Product name	WPC Outdoor Round Hole Decking
Size	140*25mm
Thickness	25mm
Color	OEM
Length	2.2m/2.4m/2.6m/3m/customized
Main materials	Wood fiber + PE + Additives
Features	waterproof, fireproof, rotproof, slip resistant, UV resistant.inset
Application	Garden, backyard, swimming pool, balcony, terrace, hally,farm

Green environmental protection 0 formaldehyde ,

non-slip and wear-resistant

high safety

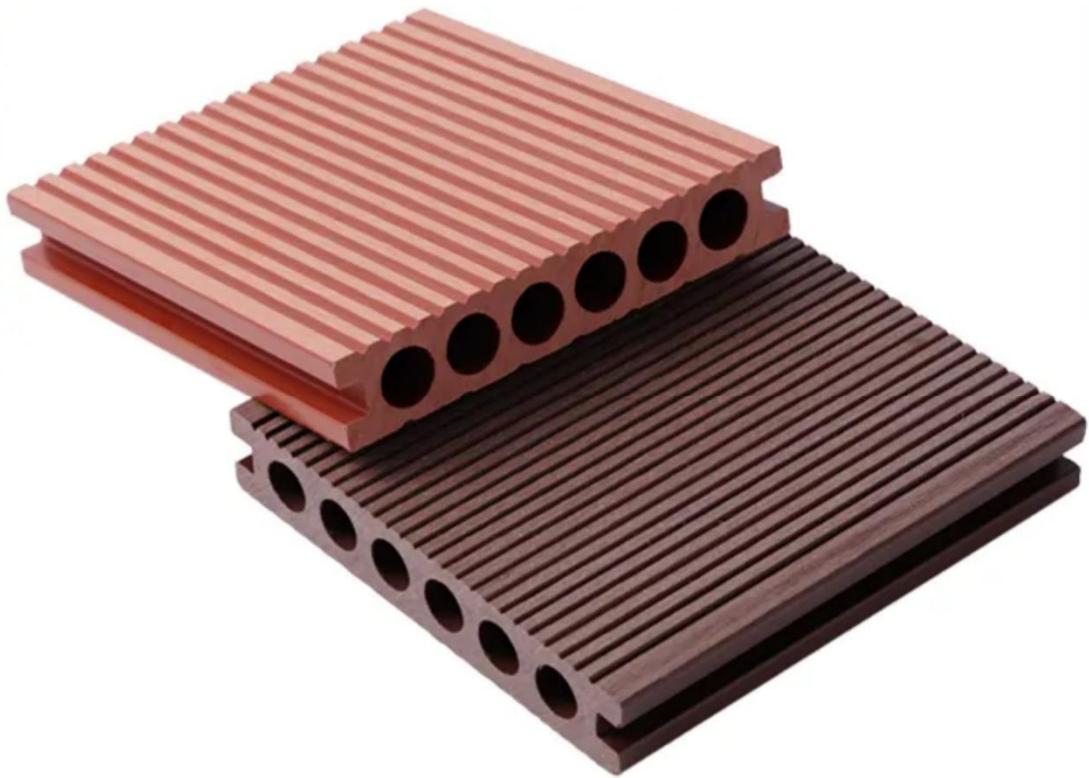

Waterproof

No cracking, no expansion

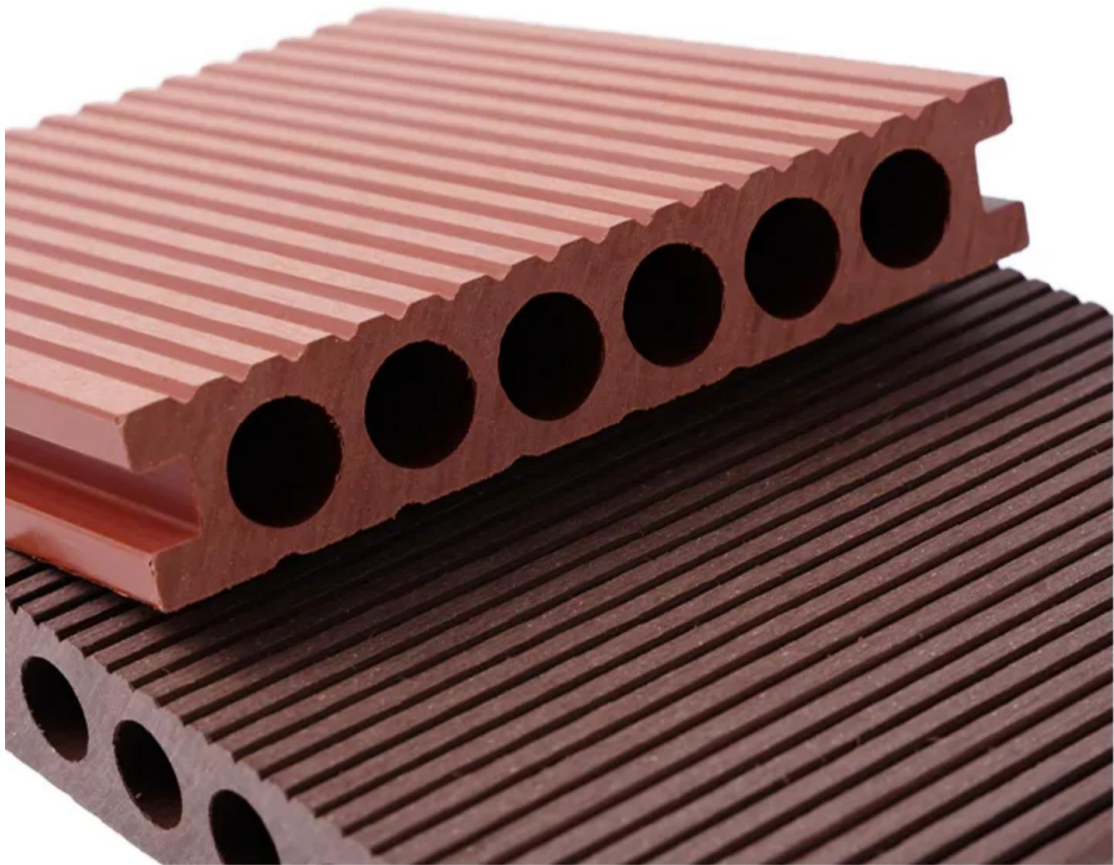

No deformation , high fire

Resistance , suitable for outdoor

Anti-corrosion

The surface is designed to prevent slipping in the rain, cracking and deformation. Only real materials can provide customers with products that meet their needs.

## SOLID WOOD TEXTURE

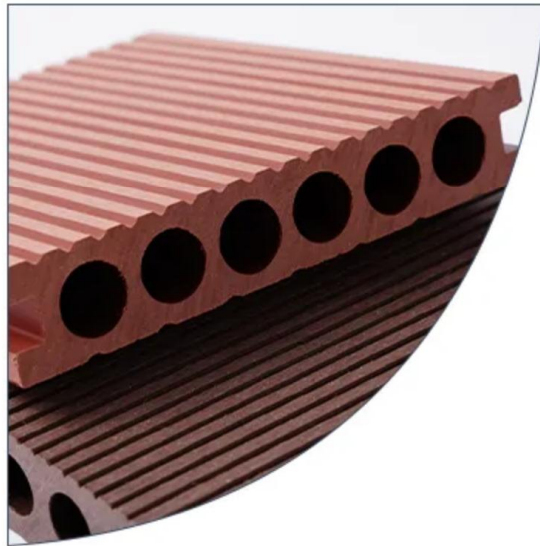

The solid wood texture is made of wood powder and PE with a natural wood feeling, comfortable and natural.

## LONG SERVICE LIFE

The super long-life plastic wood floor can be used outdoors for 15-30 years.
